QUESTION

How can a surface craft say it cannot comply?

© rpvfalmeida · CC BY-NC-ND 4.0

Search and rescue signals
010 Air Law and ATC Procedures › 10 Search and rescue

QUESTION

Which signal tells a surface craft that its help is no longer required?

© rpvfalmeida · CC BY-NC-ND 4.0

Search and rescue signals
010 Air Law and ATC Procedures › 10 Search and rescue

QUESTION

Where does the aircraft cross a surface craft for follow me, and where for no longer required?

© rpvfalmeida · CC BY-NC-ND 4.0

Search and rescue signals
010 Air Law and ATC Procedures › 10 Search and rescue

QUESTION

What is a projected course?

© rpvfalmeida · CC BY-NC-ND 4.0

Search and rescue signals
010 Air Law and ATC Procedures › 10 Search and rescue

ANSWER

Cross its wake close astern at low altitude. Do not circle or head off.

Annex 12, Appendix 1.1 and 1.2

© rpvfalmeida · CC BY-NC-ND 4.0

Search and rescue signals
010 Air Law and ATC Procedures › 10 Search and rescue

ANSWER

It can hoist the international flag N, or flash a succession of the letter N in Morse code.

Annex 12, Appendix 1.2, Note

© rpvfalmeida · CC BY-NC-ND 4.0

Search and rescue signals
010 Air Law and ATC Procedures › 10 Search and rescue

ANSWER

The track a surface craft follows if it holds its present heading.

Annex 12, Appendix 1.1

© rpvfalmeida · CC BY-NC-ND 4.0

Search and rescue signals
010 Air Law and ATC Procedures › 10 Search and rescue

ANSWER

Follow me: close ahead of the projected course. No longer required: close astern, across the wake.

Annex 12, Appendix 1.1 and 1.2

QUESTION

How does an aircraft show by day that it understood a ground signal?

© rpvfalmeida · CC BY-NC-ND 4.0

Search and rescue signals
010 Air Law and ATC Procedures › 10 Search and rescue

QUESTION

How does an aircraft show by night that it understood a ground signal?

© rpvfalmeida · CC BY-NC-ND 4.0

Search and rescue signals
010 Air Law and ATC Procedures › 10 Search and rescue

QUESTION

What does it mean when an aircraft makes no such signal?

© rpvfalmeida · CC BY-NC-ND 4.0

Search and rescue signals
010 Air Law and ATC Procedures › 10 Search and rescue

QUESTION

Does repeated switching of the landing lights answer a ground signal?

© rpvfalmeida · CC BY-NC-ND 4.0

Search and rescue signals
010 Air Law and ATC Procedures › 10 Search and rescue

ANSWER

It flashes its landing lights on and off twice. With no landing lights, it switches its navigation lights on and off twice.

Annex 12, Appendix 3.1(b)

© rpvfalmeida · CC BY-NC-ND 4.0

Search and rescue signals
010 Air Law and ATC Procedures › 10 Search and rescue

ANSWER

It rocks its wings.

Annex 12, Appendix 3.1(a)

© rpvfalmeida · CC BY-NC-ND 4.0

Search and rescue signals
010 Air Law and ATC Procedures › 10 Search and rescue

ANSWER

No. Two flashes answer a ground signal. Repeated switching is the urgency signal for an aircraft with difficulties.

Annex 12, Appendix 3.1(b); SERA Appendix 1, 1.3.1(a); Annex 12, Appendix 3.1(b)

© rpvfalmeida · CC BY-NC-ND 4.0

Search and rescue signals
010 Air Law and ATC Procedures › 10 Search and rescue

ANSWER

The ground signal has not been understood. No separate not-understood signal exists.

Annex 12, Appendix 3.2
